ABOUT US

At Udyan, we are the leading manufacturer and distributor of HDPE pipes and Irrigation systems in Odisha. Recognized for our innovative entrepreneurial initiatives that have propelled us to significant market success. We have built the trust of our consumers across the state through our unwavering professionalism and commitment to quality.

Quality is the cornerstone of our business, enabling us to make a lasting impression on nature. At our facility, we conduct rigorous quality tests under strict quality control guidelines. Each product undergoes periodic checks to ensure it meets the highest standards of durability, robustness and overall excellence. Our standardized products are certified by the Indian Standards Institute (I.S.I) and the Bureau of Indian Standards (BIS), reflecting our dedication to quality and reliability.

PRODUCTS

High-Density Polyethylene (HDPE) Pipes:

SWASTIK HDPE pipes provide a strong, durable, and cost-effective solution for potable water supply, irrigation, and bore-well applications. Our pipes and fittings are available in PE 63, PE 80, and PE 100 grades, catering to a wide range of needs and applications, size varying from 20 MM to 200 MM

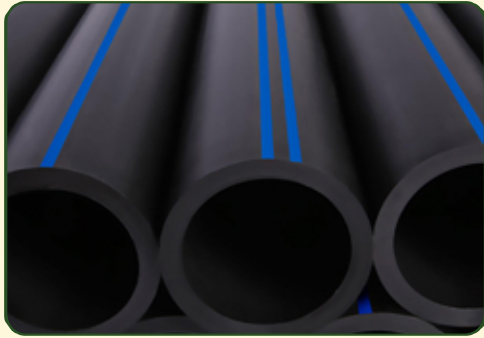

Udyan's plant is fully integrated with a quality control laboratory that conducts stringent tests on both raw materials and finished goods. This ensures uncompromising quality and consistency, meeting the specifications outlined in various Indian and international standards.

By maintaining high standards and rigorous testing, we ensure that our products consistently deliver exceptional performance and reliability. Our commitment to quality makes SWASTIK HDPE pipes a trusted choice for diverse applications.

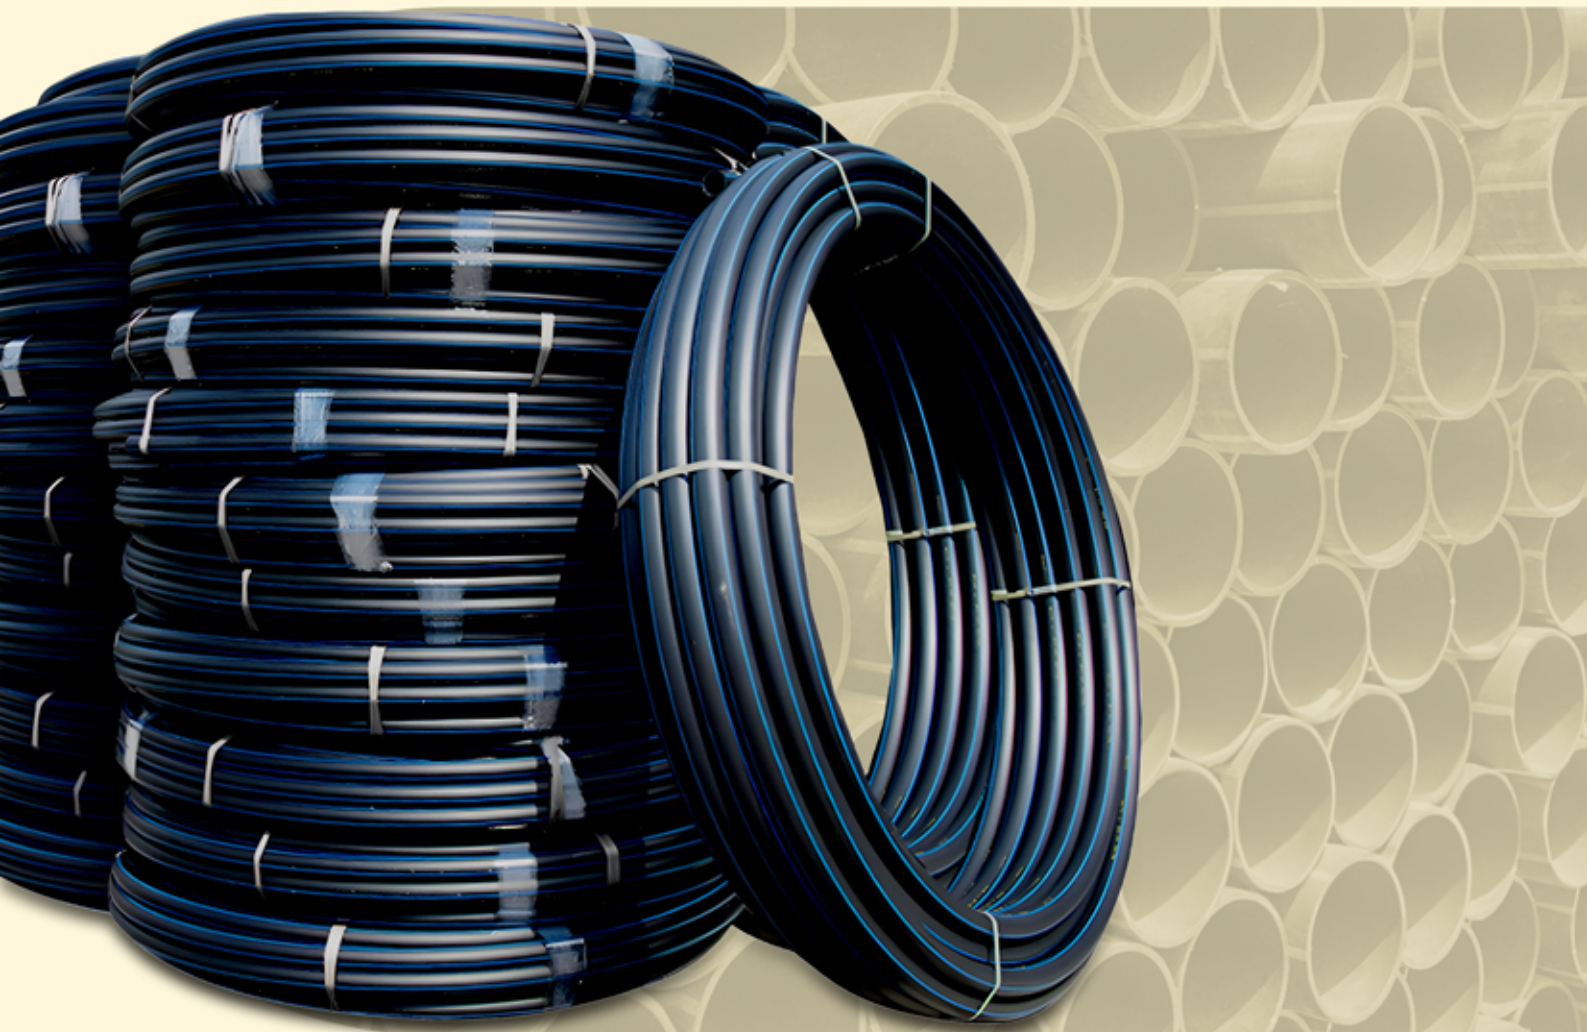

PRODUCTS

High-Density Polyethylene (HDPE) Pipes:

- Cost effective & light in weight.
- Flexible and Tough.
- Approved under EPM Department Govt. of Odisha.
- Quick and easy installation with coupler joints.

PRODUCTS

Sprinkler Irrigation System

Sprinkler irrigation is a device used to irrigate agricultural and horticultural crops, applying water in a controlled manner similar to rainfall. This method distributes water through a network that may consist of pumps, valves, pipes, and sprinklers, making it ideal for uneven land where sufficient water is not available.

The sprinkler system includes pipes and fittings made from HDPE material, along with a complete range of accessories. Our HDPE pipes and fittings are designed to ensure high strength and durability, meeting IS standards.

We are committed to manufacturing these irrigation systems to the highest quality, ensuring they provide reliable and efficient irrigation for various agricultural and horticultural needs.

Your best *Farming* partner

PRODUCTS

● Installation

The Perpendicular Pipes, having rotating nozzles on top, are joined to the main pipeline at regular intervals of time when water is allowed to flow through the main pipe under pressure with the help of a pump it escapes the main nozzles & gets sprinkled on the crop. An unique irrigation Sprinkler system is specifically designed to ensure maximum water saving, combining high quality, affordability and ease of Installation.
